

## Road tows specifications

Our smart road tows are easy to operate and transport. This is the perfect choice when you have a smaller power need, and need a flexible solution. These generators have a built-in diesel tank, but you can rent a bigger tank on wheels in case you need it.

The road tows have a capacity from 30 to 100 kVA and can easily be switched between 400V and 230V. These generators are equipped with remote monitoring, which gives the opportunity to easily monitor the fuel level, current load and location of the generator.

Details are given for guidance only. Exact equipment may vary according to geographical location and availability.

1. Performance data quoted in accordance with ISO 8528-1
2. Amps 50 Hz at pf 0.8
3. Fuel consumption measured at 75% load. Fuel density is 850 G/L
4. Includes oil and coolant
5. Sound levels given at 75% prime power load 50 Hz at 7m
