

## Fuel tanks

# Fuel tank specifications

For an efficient operation of our generators we offer a range of ancillaries for rent, including environmentally-safe diesel fuel tanks. Our range of fuel tanks is UN1202 compliant and ADR approved.

They allow environmentally safe supply of fuel to our equipment where an auxiliary source is required, or if the equipment's own internal tank does not allow sufficient running time.

The robust pressure tested containers are equipped with quick release couplings, fork lift pockets and a lockable, vandal-proof access hatch. They ensure safe and secure containment of bulk fuel supplies for generators, heaters and hot water systems.

**Details are given for guidance only. Exact equipment may vary according to geographical location and availability.**

The majority of our fuel tanks are equipped with fuel level monitoring. Fuel level indicators and fuel level monitoring give only an indication of the current content and may not be seen as accurate values.

\*AB 1000 has a built-in AdBlue pump and a water- and particle filter in addition to a filler hose and fuel gun.
